EDUCATION

Texas A&M University College Station, Texas
Master of Science in Engineering Management – Business Analytics Specialization May 2026
Relevant Coursework: Management of Engineering Systems, Data Analysis, Marketing, System Analysis & Design *(GPA: 3.6/4)*

Pandit Deendayal Energy University, School of Technology Gandhinagar, India
Bachelor of Technology in Electronics & Communication Engineering May 2024
Relevant Coursework: Object Oriented Programming, Data Mining, Machine Learning, Python Programming *(GPA: 4/4)*

EXPERIENCE

Staytuned LLP Ahmedabad, India
Business Analyst Intern *January 2024 - May 2024*

- Engineered an intelligent issue-management system using the GitHub API to auto-categorize 180+ monthly issues by priority & bug type via keyword analysis, cutting mean-time-to-resolution for P0/P1 issues from 48 to 29 hours (40% reduction)
- Drove data-informed roadmap decisions by mining repository metrics (PR cycle time, sprint velocity) in Python & SQL, building a Power BI dashboard tracking 8 KPIs that surfaced 3 bottlenecks & lifted sprint completion by 26%
- Led cross-functional team of 6 to automate development workflows using JavaScript & GitHub Actions, creating PRDs & deploying automation for issue triage & PR labeling, reducing manual steps from 10 to 2, saving 15+ developer hours weekly

Wealthstreet Financial Services Ahmedabad, India
Data Engineer Intern *January 2023 - January 2024*

- Automated ingestion of daily NSE/BSE market data feeds into an Amazon S3 data lake using AWS Glue & Kinesis Firehose, orchestrated via Apache Airflow, cutting report turnaround by 35% & eliminating 90% of manual data-entry errors
- Built dbt transformation models on Amazon Redshift converting 2M+ client trading records across equities, F&O, and mutual funds into analytics-ready tables, powering an RFM segmentation model that flagged 4 high-value cohorts for the RM team
- Created a dashboard on Redshift data tracking AUM & brokerage revenue across 12K+ accounts, saving 8+ hours weekly

Innodel Technologies Pvt. Ltd. Ahmedabad, India
Data Analyst Intern *May 2022 - July 2022*

- Designed Tableau dashboard visualizing cardiovascular illness trends across key metrics (prevalence rate, age distribution, regional spread) enabling healthcare providers to identify high-risk patient segments and inform treatment strategies
- Trained a collaborative filtering model on a 500K+ row Netflix dataset to surface genre affinity patterns, isolating a high-retention docuseries & international-content cohort that shaped 4 personalization recommendations for retention strategy

PROJECTS

ShopSense: Market Intelligence Analysis [Dashboard Link] *April 2026*

- Engineered an end-to-end retail analytics pipeline using Python and MySQL on 1M+ transaction records, applying RFM segmentation and Market Basket Analysis to uncover customer cohorts & product associations for retention & cross-sell
- Built an interactive Streamlit dashboard with GenAI-powered insights (Gemini 2.5 Flash), visualizing KPIs across customer segments, geographies, and product categories, translating complex model outputs into actionable recommendations

Predictive Modeling for Concrete Strength [Dashboard Link] *February 2026*

- Built an end-to-end predictive analytics dashboard in Python and Streamlit integrating Ridge Regression, Decision Tree, and classification models (LDA, QDA, KNN) to forecast concrete compressive strength across 8 KPIs trends via Plotly
- Developed a real-time mix design prediction tool with GenAI-powered recommendations (Gemini 2.5 Flash), translating complex model outputs into actionable, stakeholder-ready insights for data-driven decision making

Explorations In Yoga Pose Detection using Computer Vision models *May 2024*

- Led development of a real-time Yoga Pose Detection system using Machine Learning models (Mediapipe & Movenet), integrating multi-joint key point tracking to achieve real-time pose detection accuracy ranging from 95.4% to 98.7%
- Optimized model performance through data augmentation and iterative fine-tuning across varied lighting and angle scenarios on a dataset of 6,000 images, reducing false detection rate by 22% and delivering a highly accurate, user-centric solution

SKILLS & CERTIFICATIONS

Tools: Tableau, Power BI, Excel, AWS, Amazon Redshift, Apache Airflow, dbt, Streamlit, MySQL, GitHub, Google Analytics
Technical Skills: Python, SQL, ETL Pipelines, RFM, Market Basket Analysis, Machine Learning, A/B Testing, EDA
Certifications: 'Professional Scrum Master (PSM 1)' - Scrum.org, 'Engineering Project Management'- Texas A&M University
'Understanding Incubation and Entrepreneurship' - Indian Institute of Technology (IIT) Bombay (Top 1% scorer)
Leadership & Involvement: Student Assistant (Texas A&M University), Business Analytics & Consulting Association (TAMU)
